L. Plympton, Chairman, Geo. W. Lyman, Secretary, E. F. Ensign, N. Witlson and L. Kimball a Committee on Resolutions.

After a prayer offeredby Rev. Mr. White, L. S. Sherman, Esq., of Ashtabula, addressed a crowded house for one and a half bours, in a very able, appropriate and touching speech. On the conclusion of Mr. Sherman's speech, a series of stirring resolutions, pre-

EDITOR LEADER: The largely attended funeral, to-day, of the late Mr. James Pawcett, was the best evidence, by scores of attendants, of their respect and regard for a good citizen, an upright business man, a generous friend and a perfect gentleman. Something more than a mere passing notice is due to the position and character which this young man had attained at the time of his death. Relying solely upon his own exertions since the age of fourteen, he had, at twenty-six, won a place in the social and business world which many older men might envy. He was born in England, his father being Superintendent of the Liverpool and Essex Railroad, James came to this country when fourteen and joined in the tide of emigration to the then Territory of Kansas. Remaining there but a short time, he came to Cincinnati, and from there to Cleveland, where he was employed for a time by his cousin, W. C. Scoffeld, Esq. He was afterwards in the employ of Comstock & Newberry, and sub-sequently went to Middlesex, Pa., in the employ of Mr. Hewitt, who has a founday at that place. At the breaking out of the war he entered the 10th Pennsylvania the war he entered the 19th Pennsylvanis regiment. At the close of its nine months terms of service, he first became interested in oil operations by going in company with Mr. Scofield in a refinery upon oil creek, using therefor what money he had been able to save during his eight years of labor. Since that time he has given his chief attention to the oil business, and has been one of the most successful operators in the oil country. He was generally required out. oil country. He was generally pointed out as "one of the lucky ones," but the secret of his "luck," was in his keen perception of cause and effects, and his ability to readily omprehend all the phases of business com-lications. Latterly he has been in company with his old employee, Mr. Hawitt, in the commission business in New York, and both in that city and throughout the cil regions, his business reputation is equalled by few and surpassed by none. Young as he was, he had achieved a splendid distinction in commercial circles, and had he lived he would have been one of the leading capitalists of the country. These are high terms of commendation, but for their justice I appeal to all who have had

business relations with him.

Socially, no man was more universally steemed than Mr. Fawcett. Attractive in erson and cultivated in mind, he had en-cared himself to a multitude of acquaint-nces, all of whom will deeply mourn his intimely death. A self made man himself he was ever ready to extend sympathy and aid to those who were honestly struggling Mr. Fawcett's residence was at Titusville,

HOSTETTER'S STOMACH BITTERS WAS SITTLE ging into notice against the prejudices which everything new, h wever excellent, is doomed to TO DAY

It stands at the head of all tonic and alterative preparations in existence. Its calebrity has avoked many imitations, but no risels. Physicians promonate it the call save arisels. Physicians promonate the call of the very best tonic for courselecture, and report it as invaluable for sustaining the vigor of treets on the match, as a remedy for courty and all scorbuile affections, and as the only specime for sustaining the vigor of treets out the match, as an attackness. California and as the only specime for sustaining the Mustar's Ministers per coordinate, and in byanish america and all the tropical climates, it is considered the only reliable antitote to epidemic fovers.

fevers.

There is no mystery about the cau es of its success. It is the only stomachic and alterative in which are combined the grand requestes of a mini, pure and unwitisted veget-the simulativi, while the first selection of tould, anti-bill us, and scorbutle, aperient, and depirative hords, plants, roots and barks, that have ever been intermixed in a medicinal preparation. and barks, that have ever been intermized in a medicinal preparation.

The Bitters rave this distinctive quality, which is not shared, it is believed, by any tends, tincture, or extract in the world; they do not excite the pulse, though tany intus a wooderful degree of vigor into the nervous system, and strengthen sed sustain the whole physical organization.

It is also proper to state that the Bitters are sold exclusively in glass, and never under any circumstances by the gallon or the barrel. Imposters and imisators are abroad, and the only safegard the public have against them is to see that the Bitters they may bear the engraved label and note of hand of Messra Hostetter & Smith, seed the Government stamp over the cork of the bottle.

In Market Market Smith and the server means the same over the cork of the bottle.

FINANCIAL. MORNING LEADER OFFICE, SATURDAY EVENING, April 29, 1865. For the part few days the Gold market in Ser fork has been characterized by uncommonstead! nose, and has relact duth and weals, with an almost to'al absence of speculative feeling. The transactions have been confined to purchases for paying customs dues, and some sales by bankers and for eigners. The World of to day srys "the feeling is prevalent that a considerable decline will take place from the expected shipment of 5-20 bends to Europe next week " The steamer from Europe to day reports a further advance in Government se curities in the English market, and this being the aso, it is not unlikely it also brings large orders for Government excurities, including the re-invest nent of the interest on the May coupens due to foreigners, thus serving the double purpose of re aining the specie paid out by the Government in the home market and also producing a reaction in fereign exchange, effects which must be materially felt by gold at once, while the prospects of an incres ed movement in the same disection, when the news of the utter abandonment of the Confideracy shall have reached the capitalists on the other side of the ocean, will have a tendency to keep the marhet week and put an effectual curb upon any efforts for an afrace. A other aid in keeping gold down will be found in the steadily reduced expenses of the Government, which has already commenced on a liberal scale, and which within six months may ation. In the meantime the Popu or Loan is being taken to the amount of over millions a day, leaving a delly surplus of shout two millions in the Treasury for the reduction of the debt. It is probable, therefore, that the permanent changes in Gold hereafter, governed as it will be by comme cial causes, will be to lower figures until a spec basis is reasoned. The fluctuations vesterday and to-day were within one percent, the price to-night closing at 160%. In this market there is very little specie affering. Brakers were paying 144 for gold to day and selling at 145; Silver dul; at 135 buying

and 147 milling. Five twenty May coupons were it moderate off ring at 14 @144. The New York Stock market continues pretty ctive under the speculative feeling encouraged by he great case in money, and prices on leading Railways recovered to-day what was lost through the bear combination of Thursday and Friday,-The market, however, is irregular.
